

The Future of Networking

Smart, Simple, Yours.

The events market today: Scattered, inefficient, and outdated.

Fragmentation: Event announcements are scattered across websites, social media and other communication channels.

Inefficiency: Manual processes make networking and event discovery and management cumbersome.

Missed opportunities: Events, companies and individuals struggle to effectively come together and stay in touch.

In today's fast-paced world, staying up to date with relevant events is a time-consuming challenge for most people. You may have to search across multiple websites, review outdated information, follow social media accounts, join countless mailing lists, and rely on recommendations just to find out about events that are crucial to your career or business. How do you find relevant events?

Seamless event discovery and smart networking.

Unified discovery: All event announcements in one single platform, i.e. accessible through sharable [Yard Calendars](#).

Smart networking: [Yard Cards](#) will help to streamline the interaction between events and people.

Own your contacts: You will be able to organize your contact through more [Yard products](#) across platforms, and decide where to save the data and how to manage them.

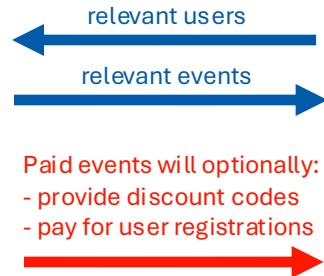

Any community can [publish an events calendar](#) on a website using one line of code, which will distribute a constant stream of relevant events. As a community manager, you don't need to curate events anymore. Plus, your users always have access to relevant events which matter to them. You need more features? Try out the Premium Yard Calendar which lets you customize the design and content.

YARD makes (relevant) events accessible to (relevant) people.

Paid Events

How YARD works.

Yard Calendar

Using a [Yard Calendar](#), many events are now easily accessible. However, you **must still look personally for relevant events** matching **your personal interests**.

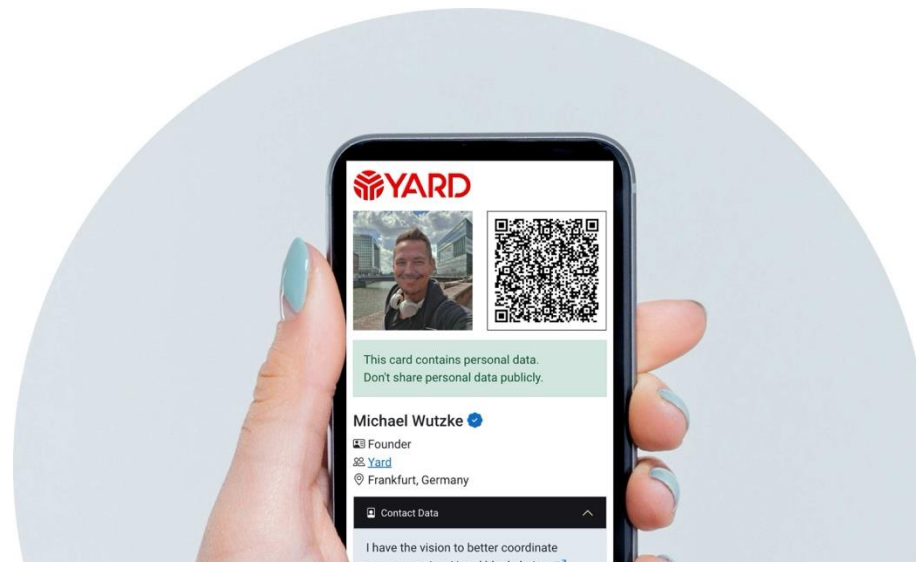

Yard Cards: Stay informed.

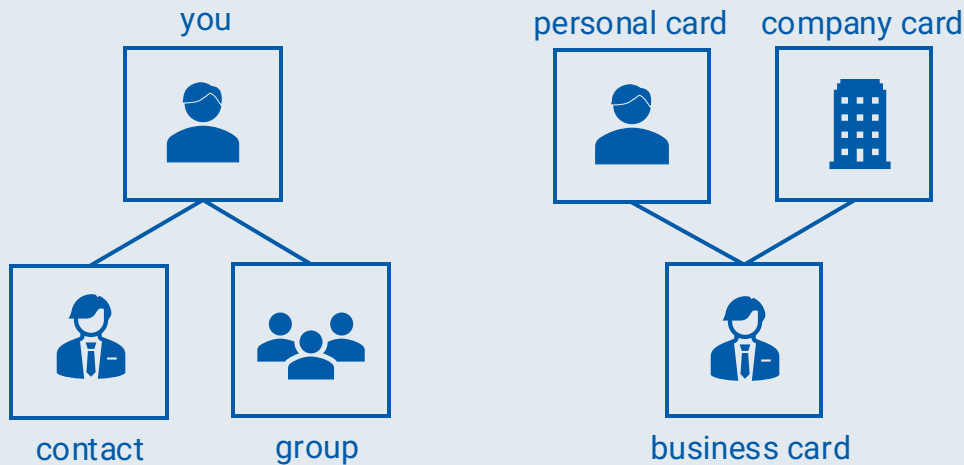

Yard will launch digital (identity) cards with the goal of allowing users to easily interact with events and other people. A Yard Card is representing a digital identity of any (natural, legal, virtual) person and anyone can manage his/her/its own card(s). Every card can have profile data stored with its, such as a name and a picture.

A card may contain **communication data of a person**, his/her/its **interests** over time, and can be connected to other software. If desired, users can receive Yard Alerts via email, messengers, and/or social media. Cards have privacy features.

Discover Yard Cards: <https://www.yard.global/cards/>

Cards can have relations.

Managers of a company have admin rights to control business cards of their employees. Cards can be connected to ID systems and other software. If desired, users can receive Yard Alerts via email, messengers, and/or social media. Cards have privacy features.

Cards can interact.

Open your card on your smartphone and show it to the person you're talking to, if you want him/her to interact with your card. Let the prospect scan the QR code and access your card. Now, the other party can interact with your card.

How YARD will earn.

With one click to the next event.

You will be able to find and register to events in seconds via your desired communication channel.

you

Yard Card

Your Yard Card is used to onboard you to events and automate data distribution.

Yard API

any event app

You can control which personal information can be used by others, for which uses and for how long in time.

Interact with people on events.

Get in contact with other people in a more organized way.

you

event

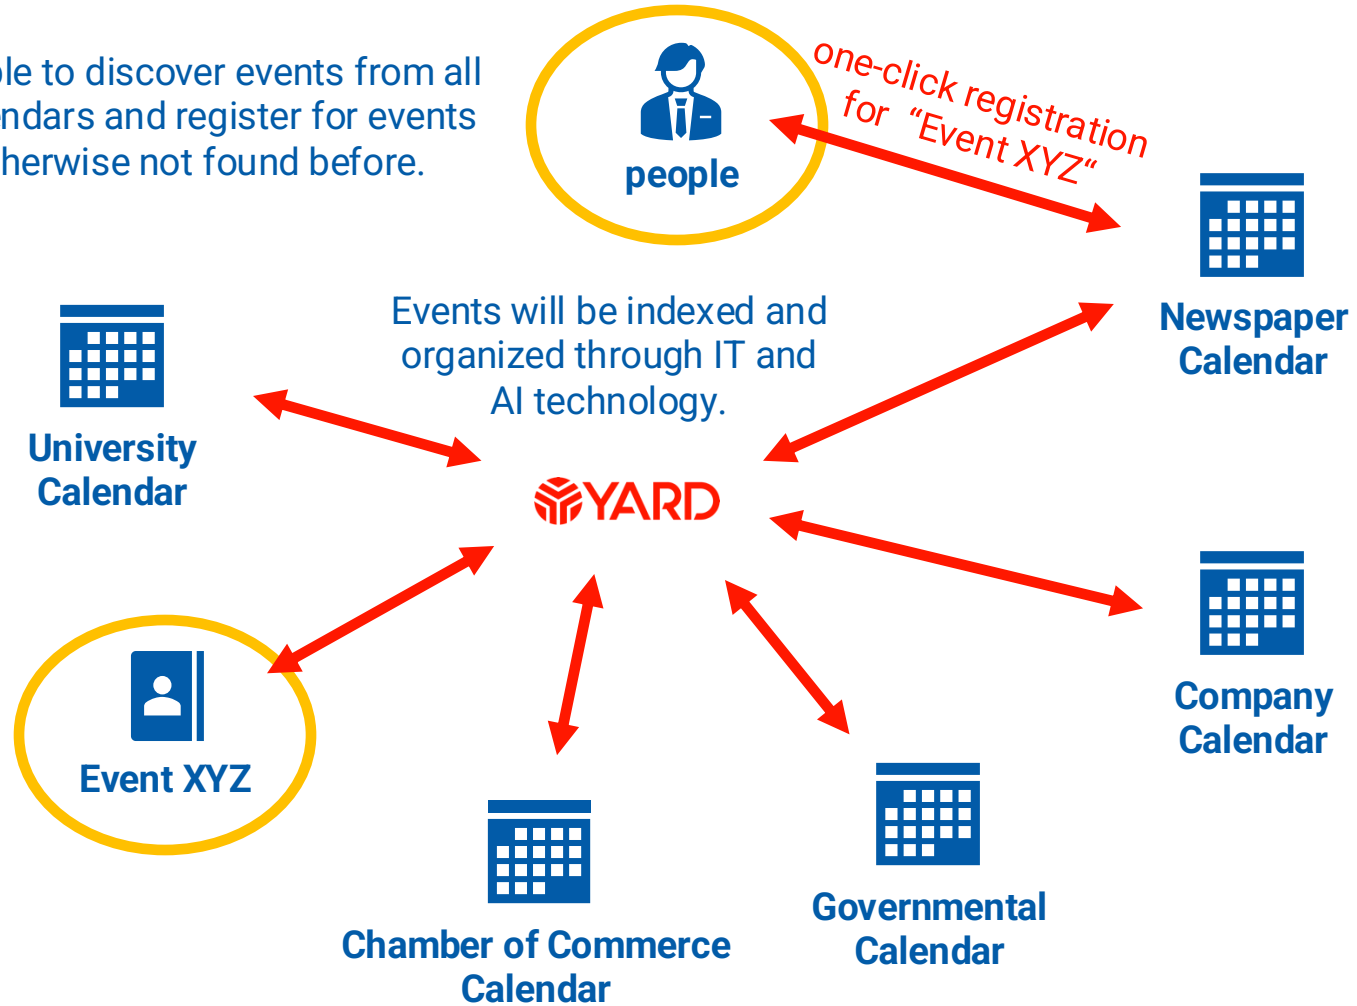

You can interact with the event and other cards since the cards know interests, skills, and related information.

Use Yard before, during, and after events using your preferred communication channel(s).

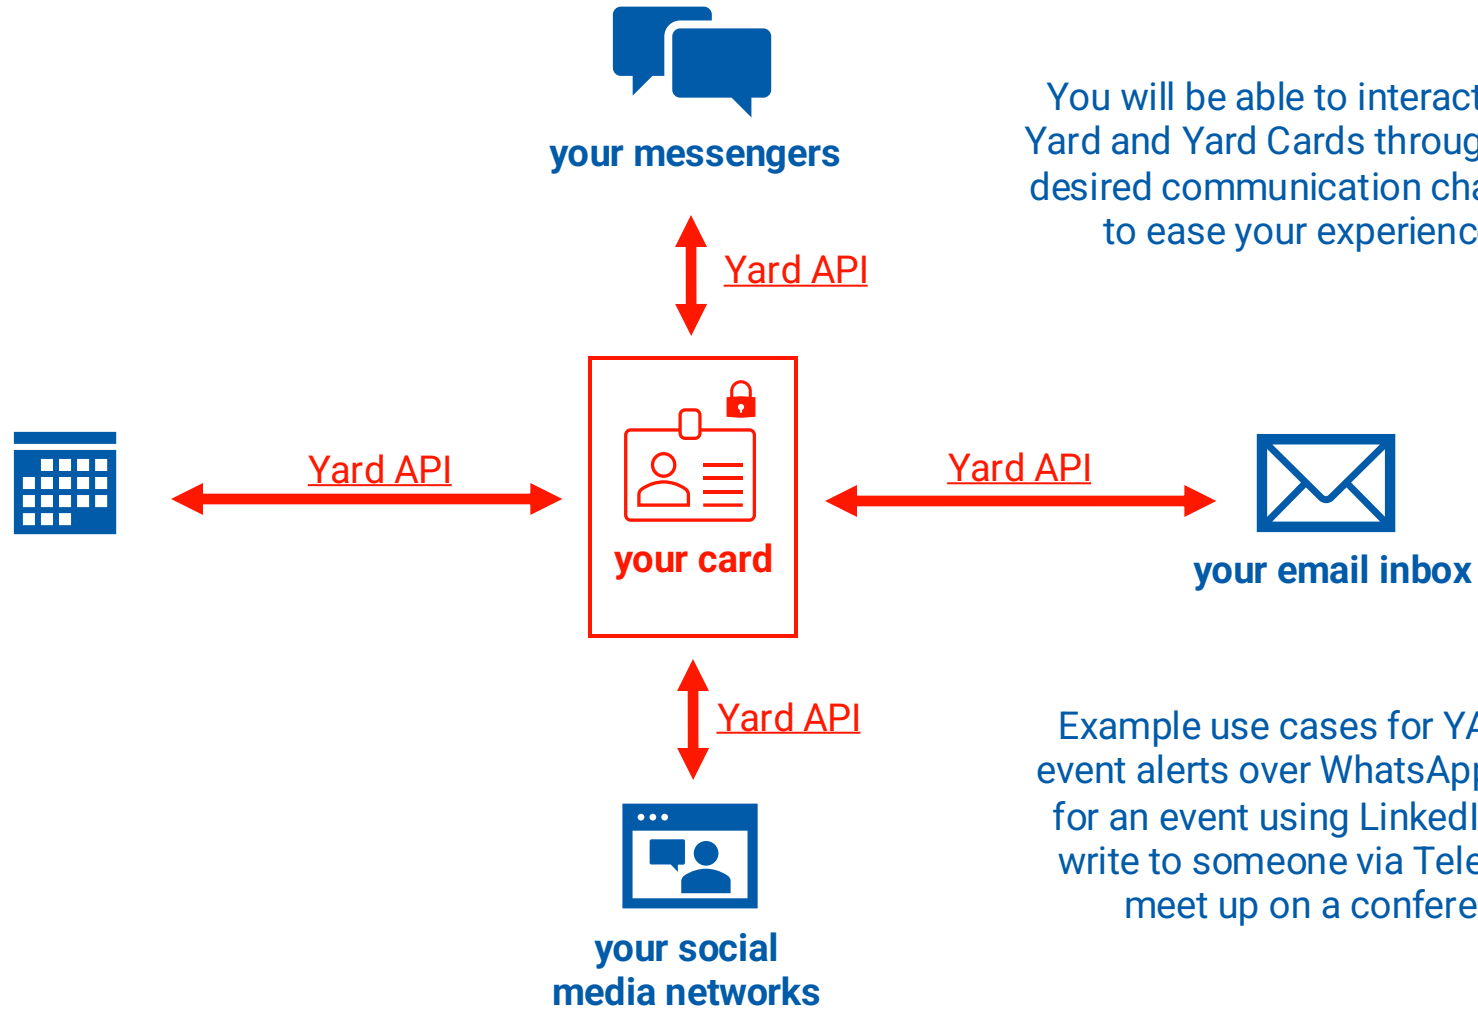

The plan: Connecting event calendars with each other.

Users will be able to discover events from all connected calendars and register for events they have otherwise not found before.

The future: Connecting communication channels.

You will be able to interact with Yard and Yard Cards through your desired communication channels to ease your experience.

Example use cases for YARD: Get event alerts over WhatsApp, register for an event using LinkedIn, or you write to someone via Telegram to meet up on a conference.

We believe in AI automation and AI agents.

"When will be the next event in Germany about XYZ?"

"OK, also get a ticket for my colleague Max."

"On April 15 in Munich. You can get a 10% ticket discount and pay XYZ € for it."

"You successfully bought two tickets. They are in your inboxes and calendars."

It takes a great team.
